### Netting and compression

The netting and compression services offered at Eurex Clearing allow our Clearing Members to reduce their outstanding gross exposure by offsetting. In addition to the capital efficiencies, there are operational benefits of netting and compression. It decreases the number of trades, contributes to reducing systemic risk and simplifies portfolio management by increasing operational efficiency and reducing potential administrative exposure in the event of a default.

### Compression

- Risk-constrained reduction of trade exposures that have similar but not identical payment dates or maturities
- Eurex Clearing remains cash flow- and market risk-neutral
- **Reduced leverage ratio** and **cost of capital**
- **Reduced initial margin** and **default fund contribution**
- **Reduced operational** and **CCP concentration risk**
- Reporting available to **preview compression opportunities**

### Netting

- **Risk-free** reduction of trade exposures
- **Reduced leverage ratio** and **cost of capital**
- **Reduced operational** and **CCP concentration risk**
- Extensive reporting and "what-if" reports to **preview netting opportunities**
